2. PURPOSE OF TRAVEL

The Technical Plans and Development Staff, NPIC, serves the Intelligence Community as a focal point for the development of new systems, instruments, materials, and devices for photographic exploitation. To provide this vital community service, NPIC must keep abreast of US industry in the photographic-optical field, and monitor new developments on a world-wide basis. In accomplishing this objective, the TP&D Staff, NPIC, has an effective program for maintaining close liaison with the US and European electro-optical industries.
